

ALLEN SCHULTZ

DevOps Engineer / Linux Systems Administrator / Infrastructure Automation

Medford, OR 97504 | 801-550-0865 | allen.schultz@gmail.com | linkedin.com/in/allen-schultz-89810014 | github.com/PhoenixCullen

PROFESSIONAL SUMMARY

Linux Systems Administrator with 8+ years of technical experience and a strong DevOps foundation built through enterprise Linux administration, infrastructure automation, and hands-on lab projects. Proven expertise in Debian-based systems, Bash automation, PXE/TFTP deployment, Docker containerization, Git/GitLab, and Cisco networking. Actively completing Boot.dev's full-stack program (Python/Go) and pursuing Linux Foundation certifications (LFCS/LFCE, DevOps/Security track). Running active Qubes OS security research on System76 hardware demonstrating advanced virtualization, encryption, and security architecture skills. Seeking remote Linux Administrator, DevOps Engineer, or infrastructure automation role.

Core Competencies:

Linux Administration (Debian, Ubuntu, Arch) • Infrastructure Automation (Bash, PXE/TFTP) • Docker & Containerization • Git/GitLab Version Control • Cisco Networking (VLANs, ACLs, Routing) • VoIP (FreeSWITCH, SIP) • Virtualization (Qubes OS/Xen, VirtualBox, KVM) • Security Architecture (LUKS, VM Isolation) • Storage (Btrfs, LVM, LUKS, RAID) • Python & Go (in progress)

TECHNICAL SKILLS

Operating Systems: Linux (Debian, Ubuntu, Arch, Manjaro, Qubes OS), Windows XP--11, Windows Server 2003--2022

Virtualization: Qubes OS (Xen hypervisor), VirtualBox, KVM, GPU passthrough, VM security isolation

Storage & Filesystems: Btrfs (subvolumes, snapshots, compression), LVM, LUKS encryption, RAID configurations

Programming & Scripting: Bash, Python (Boot.dev --- completed; Linux), Go (Boot.dev --- in progress), C (academic), C++ (academic), Java (academic), basic Perl/PHP

CS Fundamentals: Data structures (bags, trees, queues, stacks), algorithm design (time complexity, memory/space optimization), programming design, software engineering principles

Networking: Cisco IOS, routing/switching, VLANs, ACLs, routing protocols, T1/Frame Relay, SDN concepts

VoIP: FreeSWITCH PBX, SIP phone provisioning and automation, hunt groups, voicemail, fax integration

DevOps & Automation: Docker, Git/GitLab, PXE/TFTP boot environments, automated deployment scripts, infrastructure automation, Bash script libraries

Security: LUKS full-disk encryption, VM-based security isolation, CompTIA Security+, DoD compliance, secure architecture design

Tools: PXE/TFTP boot servers, package management (apt, pacman, yum), Timeshift, systemd

TECHNICAL PROJECTS & LAB EXPERIENCE

Qubes OS Security Research Platform (System76 Bonobo WS)

2024--Present

High-performance security-focused virtualization and learning environment

- Running Qubes OS 4.3 RC3 on Intel Core i9-14900HX (24 cores, 64GB DDR5, 10.8TB NVMe, dual GPU)
- Implemented security-by-isolation architecture: air-gapped vault qube, Whonix integration, compartmentalized VMs per trust level
- LUKS-encrypted storage with Intel VT-x/VT-d hardware-backed VM isolation; evaluating GPU passthrough for isolated workloads
- *Skills: Xen hypervisor, VM security isolation, pre-release software testing, GPU passthrough, Whonix/Tor privacy*

Advanced Storage Architecture Design (Desktop --- In Planning)

Enterprise-grade multi-drive storage design

- Designed Btrfs-on-LVM-on-LUKS across 5-drive 15TB+ array; three-tier volume group strategy (system NVMe, data SATA, user storage)

- Independent subvolume compression policies per workload; full LUKS encryption across five volumes; automated Timeshift disaster recovery
- *Skills: LVM topology, Btrfs advanced features, multi-tier storage strategy, encryption, disaster recovery planning*

Multi-System Administration Portfolio (Ongoing)

- Active management of Arch workstation + Qubes OS laptop; contributing to MegaMek/MekHQ open-source project via GitLab
- Boot.dev completed (April 2026): Python, Linux, Build a Bookbot (github.com/PhoenixCullen/bookbot), Learn Git / Git Ops 1 --- Webflyx (github.com/PhoenixCullen/webflyx); progressing through OOP, data structures, Go, Docker, SQL, CI/CD, Kubernetes tracks

PROFESSIONAL EXPERIENCE

RidgeCrest Herbs, Salt Lake City, UT

Linux System Administrator & VoIP Administrator

May 2012--February 2014

Primary Linux infrastructure and VoIP administrator for 15-person herbal supplement manufacturer

Linux Infrastructure & Automation:

- Administered heterogeneous Linux environment (Debian, Ubuntu, Linux Mint); maintained 99%+ uptime for all critical systems
- Implemented automated backup solutions using Bash scripting and Git-based configuration management
- Established standardized Linux workstation deployment process reducing setup time from 4 hours to 30 minutes
- Created and maintained Bash script library for user management, backup automation, and system updates
- Administered VirtualBox VMs for development, testing, and legacy DOS database support (VirtualBox + DOSBox)
- Reduced system downtime 40% through proactive monitoring scripts and automated maintenance
- Maintained Windows XP/7 client systems alongside Linux infrastructure in mixed-OS environment

VoIP Infrastructure --- FreeSWITCH Migration:

- Migrated telephony from Asterisk PBX to FreeSWITCH; engineered complete FreeSWITCH PBX system from ground up
- Created automated SIP phone provisioning templates deployed via PXE/TFTP boot environment (zero-touch deployment)
- Deployed 15 SIP phones plus voicemail, fax, printer, and 6 hunt group support lines
- Designed system scalable to 40+ endpoints using standardized templates; eliminated configuration drift
- Reduced telephony costs 60%; integrated VoIP with network infrastructure maintaining QoS standards
- Documented all systems and procedures for knowledge transfer and disaster recovery

ITT Systems (DoD Contractor), Afghanistan

Network Administrator

September 2009--May 2010

Security-cleared network administrator for DoD communications infrastructure

- Maintained dual-tier classified network supporting 200+ users; primary duty: Cisco switch/router administration (VLANs, ACLs, routing protocols)
- Imaged and configured Windows workstations with standard OS, Office, and DoD security settings
- Administered Active Directory: computer provisioning, user account management, password resets
- Implemented critical encryption protocol updates; performed SATCOM/crypto maintenance
- Provided Tier 2/3 escalation support; maintained OpSec protocols for classified infrastructure
- Earned CompTIA Security+ certification during deployment

Convergys, Murray, UT

Total Tenure: April 2000--November 2001 (two client contracts)

Provisional Technical Engineer --- AT&T Managed Internet Services

August 2000--November 2001

- Managed end-to-end T1/FT1 business internet circuit installations: configured Cisco/Paradyne routers, CSU/DSUs
- Managed IP address allocation, subnet design, and routing configuration; troubleshoot layer 1--3 connectivity issues
- Certified as AT&T Provisional Technical Engineer

Harry and David, Medford, OR

Seasonal Data Entry Associate

September 2023--December 2025

Most recent employment --- three seasonal deployments during career pivot

- Processed 20+ orders daily into order management system with consistent accuracy during peak periods

Superior Service Transport, Salt Lake City, UT

Driver Check-in Clerk / Scheduling

April 2023--July 2023

- Verified and documented transport orders; optimized weekly load/route scheduling for truck fleet

EDUCATION

Salt Lake Community College

2001--2006, 2016--2018

Associate of Science, Computer Science

Coursework: Linux System Admin I & II, Certified Ethical Hacker, Database Management, Data Communications/Networking, Software Engineering

Estrella Mountain Community College

1997--1999

Computer Science Coursework

Coursework: Cisco Advanced Routing & Switching (I--IV), C Programming, Computer Maintenance/A+ Preparation

Boot.dev

In Progress

Full-Stack Backend Development Program

Python (Apr 24 2026) • Linux (Apr 25 2026) • Build a Bookbot (Apr 25 2026) • Learn Git / Git Ops 1 (Apr 25 2026) --- completed; OOP, Data Structures, Go, Docker, SQL, CI/CD, Kubernetes --- in progress

CERTIFICATIONS

Active: Linux Essentials --- LPI (2023) • CompTIA Security+ (2010) • CompTIA A+ (2007)

In Progress: Linux Foundation Certified System Administrator (LFCS) • Linux Foundation Certified Engineer (LFCE)

Historical: Cisco CCNA • Dell Tier 2 Hardware Certification • AT&T Provisional Technical Engineer

Available immediately for remote work | Salary: \$46,500+ annually

Physical Note (temporary): Recovering from surgery (May 2026); no lifting over 10 lbs until approximately late June 2026. Available for desk and remote work immediately --- no restrictions apply to desk-based roles.
