

ALLEN SCHULTZ

NOC Analyst / Network Administrator / Network Operations

Medford, OR 97504 | 801-550-0865 | allen.schultz@gmail.com | linkedin.com/in/allen-schultz-89810014 | github.com/PhoenixCullen

PROFESSIONAL SUMMARY

Network administrator and systems professional with hands-on Cisco infrastructure experience in high-stakes environments, including classified DoD network operations in a combat zone. Deep practical knowledge of Cisco IOS, VLANs, ACLs, routing protocols, and network segmentation. Additional background in VoIP infrastructure (FreeSWITCH/SIP), T1/Frame Relay circuit management, Linux systems administration, and network security. Systematic OSI-layer troubleshooting approach. CompTIA Security+ and CCNA (historical) certified. Seeking remote NOC Analyst, Network Operations Technician, or Network Administrator role.

Core Competencies:

Cisco IOS (Switches & Routers) • VLANs, ACLs & Network Segmentation • Routing Protocols (OSPF, RIP, static) • Network Security & DoD Compliance • T1/Frame Relay Circuit Management • VoIP (FreeSWITCH, SIP, QoS) • Linux Networking (iptables, routing, bridging) • Active Directory & Windows Server • Network Documentation & Troubleshooting • SDN Concepts

TECHNICAL SKILLS

Networking: Cisco IOS, routing/switching, VLANs, ACLs, routing protocols, T1/Frame Relay, CSU/DSU configuration, SDN concepts

Security: DoD classified network compliance, LUKS encryption, VM-based network isolation, CompTIA Security+, OpSec procedures

VoIP & Telephony: FreeSWITCH PBX, SIP protocol, QoS for real-time traffic, codec negotiation, NAT traversal, hunt groups

Linux Networking: iptables, network interfaces, routing, bridging, VLANs, SSH administration

Windows & AD: Active Directory, Windows Server 2003--2022, DNS/DHCP, workstation provisioning

Monitoring & Tools: OSI-layer systematic troubleshooting, network management tools, circuit testing, documentation

Virtualization: Qubes OS (VM-per-network-zone architecture), VirtualBox, KVM

PROFESSIONAL EXPERIENCE

ITT Systems (DoD Contractor), Afghanistan

Network Administrator

September 2009--May 2010

Security-cleared network administrator for DoD communications infrastructure in active combat zone

- Maintained dual-tier classified/unclassified network infrastructure supporting 200+ users in hostile environment
- **Primary Cisco administration:** Switches and routers --- VLANs for network segmentation, ACLs for access control, routing protocols for traffic management; zero-tolerance security environment
- Administered Microsoft Active Directory, Exchange Server 2003, and Windows Server 2003 domain services
- Imaged and provisioned Windows workstations with standard OS, Office, and DoD-mandated security settings
- Implemented critical encryption protocol updates on tight deadlines; performed SATCOM/crypto maintenance
- Provided Tier 2/3 escalation support for SATCOM administrators; executed emergency network maintenance during operational periods
- Maintained OpSec protocols for classified communications infrastructure throughout deployment
- Earned CompTIA Security+ certification during deployment (required for position)

RidgeCrest Herbals, Salt Lake City, UT

Linux System Administrator & VoIP Administrator

May 2012--February 2014

Network & VoIP Infrastructure:

- Designed and deployed FreeSWITCH PBX network: planned QoS requirements, configured network boot environment (PXE/TFTP), integrated VoIP with LAN infrastructure

- Troubleshoot Layer 2/3 issues affecting VoIP call quality; adjusted switch configurations for QoS optimization
- Deployed 15 SIP phones plus voicemail, fax, and 6 hunt group lines across company network; reduced telephony costs 60%
- Designed system scalable to 40+ endpoints using standardized automated provisioning templates
- Administered Linux servers and Windows XP/7 clients in heterogeneous network environment; 99%+ uptime

Convergys, Murray, UT

Total Tenure: April 2000--November 2001 (1.5 years across two client contracts)

Provisional Technical Engineer --- AT&T Managed Internet Services

August 2000--November 2001

Network circuit project manager for T1/Frame Relay business internet installations

- Managed end-to-end T1/FT1 circuit installations: configured Cisco and Paradyne routers, CSU/DSUs for circuit termination
- Coordinated with AT&T vendors and third-party circuit providers for complex multi-vendor installations
- Managed IP address allocation, subnet design, and routing configuration for customer networks
- Troubleshoot layer 1--3 connectivity issues during installation and activation phases
- Utilized network management tools for circuit testing and performance verification
- Certified as AT&T Provisional Technical Engineer

@Home Internet Support --- AT&T Contract

April 2000--August 2000

- Coordinated with network operations center for outage information and escalations
- Provided Tier 1 cable modem internet support; troubleshoot connectivity, email, and routing issues

Network Architecture --- Personal Lab (Ongoing)

Qubes OS Network Isolation Research (System76 Bonobo WS) --- 2024--Present

- Implemented per-VM network security zones using Qubes OS firewall VM architecture
- Network segmentation via VM isolation: different trust levels on different virtual network segments
- VPN integration: routing specific VMs through VPN tunnels while others use direct connection
- Whonix integration for anonymized networking research; understanding of Tor routing and exit node behavior
- *Demonstrates: defense-in-depth network design, SDN-adjacent concepts, security-by-compartmentalization*

EDUCATION

Salt Lake Community College

2001--2006, 2016--2018

Associate of Science, Computer Science

Coursework: Certified Ethical Hacker, Data Communications/Networking, Linux System Admin I & II, Database Management

Estrella Mountain Community College

1997--1999

Computer Science Coursework

Coursework: Cisco Advanced Routing & Switching (CNT 160), Project Based Learning (CNT 170), Cisco Networking Fundamentals (CNT 140), Router Technology (CNT 150)

Boot.dev

In Progress

Full-Stack Backend Development --- Python completed, Go/Docker/CI-CD in progress

(Network automation via Python/Go; SDN programmability)

CERTIFICATIONS

Active: CompTIA Security+ (2010) • Linux Essentials --- LPI (2023) • CompTIA A+ (2007)

In Progress: Linux Foundation Certified System Administrator (LFCS)

Historical: Cisco CCNA --- Routing, Switching, Network Fundamentals • AT&T Provisional Technical Engineer • Dell Tier 2 Hardware Certification

TROUBLESHOOTING METHODOLOGY

Systematic OSI-layer approach: Physical (cables, link status) -> Data Link (MACs, VLANs, switching) -> Network (IP, routing, connectivity) -> Transport (TCP/UDP, ports) -> Application (service-specific). Document findings and root cause at each layer; leave clear notes for follow-up.

Available immediately for remote work | Salary: \$46,500+ annually

Physical Note (temporary): Recovering from surgery (May 2026); no lifting over 10 lbs until approximately late June 2026. Available for desk and remote work immediately --- no restrictions apply to desk-based roles.
