

ALLEN SCHULTZ

Technical Professional | Linux Administration | Network Infrastructure | IT Support | Data Entry & Administrative Operations

Medford, OR 97504 | 801-550-0865 | allen.schultz@gmail.com | linkedin.com/in/allen-schultz-89810014 | github.com/PhoenixCullen

Master archive resume — all employment history. Tailored resumes derived from this document.

PROFESSIONAL SUMMARY

Technically versatile professional with 25+ years of experience spanning Linux system administration, network infrastructure, IT help desk support, data entry, VoIP administration, and general office operations. Deep expertise in Debian-based Linux systems, Cisco networking, FreeSWITCH VoIP, and infrastructure automation. Proven track record in high-volume data processing, remote technical support, and multi-platform system administration. Currently completing Boot.dev full-stack development program and pursuing Linux Foundation certifications. Seeking remote roles in Linux/DevOps, IT support, NOC operations, network administration, data entry, or technical office administration.

Core Competencies:

Linux Administration (Debian, Ubuntu, Arch) • Cisco Networking (VLANs, ACLs, Routing) • IT Help Desk & Remote Support (TeamViewer) • Data Entry & Verification • VoIP (FreeSWITCH, SIP) • DevOps & Automation (Bash, Docker, Git) • Active Directory & Windows Administration • Microsoft Office Suite & Google Workspace • Network Operations & Security • AS/400 Systems

TECHNICAL SKILLS

Operating Systems: Linux (Debian, Ubuntu, Arch, Manjaro, Qubes OS), Windows XP–11, Windows Server 2003–2022

Virtualization: Qubes OS (Xen hypervisor), VirtualBox, KVM, GPU passthrough, VM security isolation

Storage & Filesystems: Btrfs (subvolumes, snapshots, compression), LVM, LUKS encryption, RAID configurations

Programming & Scripting: Bash, Python (Boot.dev — completed; Linux), Go (Boot.dev — in progress), C (academic — Windows, macOS 6–9, Linux), C++ (academic), Java (academic; application use on Linux via OpenJDK), basic Perl/PHP

CS Fundamentals: Data structures (bags, trees, queues, stacks), algorithm design (time complexity, memory/space optimization), programming design, software engineering principles

Networking: Cisco IOS, routing/switching, VLANs, ACLs, routing protocols, T1/Frame Relay, SDN concepts

VoIP: FreeSWITCH PBX, SIP phone provisioning and automation, Asterisk, hunt groups, voicemail, fax integration

DevOps & Automation: Docker, Git/GitLab, PXE/TFTP boot environments, automated deployment scripts, infrastructure automation

Security: LUKS full-disk encryption, VM-based security isolation, CompTIA Security+, DoD compliance, secure architecture

Remote Support & Administration: TeamViewer (web-based remote support), Remote Desktop (RDP, VNC), SSH administration

Office & Productivity: Microsoft Office Suite (Word, Excel, Access, Outlook — 97 through 2010), Google Workspace (Docs, Sheets, Gmail, Drive), LibreOffice; basic spreadsheet functions (formulas, filtering, sorting)

Data Entry & Processing: Keyboard typing (~60–80 WPM), high-volume production data entry, order management systems, address image coding (USPS production speed), data verification and reconciliation

Legacy & Specialized Systems: AS/400 (IBM iSeries), DOSBox/legacy DOS application support

Tools: PXE/TFTP boot servers, package management (apt, pacman, yum), Timeshift backup, systemd

TECHNICAL PROJECTS & LAB EXPERIENCE

Qubes OS Security Research Platform (System76 Bonobo WS)

2024–Present

High-performance security-focused virtualization and learning environment

- Running Qubes OS 4.3 RC3 (pre-release Xen-based security hypervisor) on Intel Core i9-14900HX (24 cores, 64GB DDR5 RAM)
- Implemented security-by-isolation architecture: vault qube (air-gapped) for key storage, Whonix integration, compartmentalized work/personal/untrusted VMs

- LUKS-encrypted storage with hardware-backed VM isolation (Intel VT-x, VT-d); evaluating GPU passthrough for isolated workloads
- 3x 3.6TB NVMe drives (10.8TB enterprise storage), dual-GPU architecture
- *Skills: Xen hypervisor, VM security isolation, pre-release testing, hardware compatibility troubleshooting, Whonix/Tor privacy research*

Advanced Storage Architecture Design (Desktop Workstation — In Planning)

Enterprise-grade storage solution design for production deployment

- Designed Btrfs-on-LVM-on-LUKS across 5-drive 15TB+ array with three-tier volume group strategy
- Separate volume groups for system (performance NVMe), data (aggregated SATA), and user storage; independent subvolume compression and snapshot policies
- Full LUKS encryption across all five volumes; automated Timeshift disaster recovery integration
- *Skills: LVM topology design, Btrfs subvolumes/snapshots/compression, multi-tier storage strategy, encryption, backup/DR planning*

Multi-System Administration Portfolio (Ongoing)

Active management of diverse Linux environments

- Primary Arch-based workstation + System76 Bonobo WS (Qubes OS) + assisted Windows-to-Linux migration for personal contacts
- Git/GitLab workflows; contributing to MegaMek/MekHQ open-source project
- Boot.dev full-stack program: Python (completed Apr 2026), Linux (completed Apr 2026); progressing through OOP, data structures, Go track

PROFESSIONAL EXPERIENCE

Uber Eats — Independent Delivery Contractor

2023–2026

Food Delivery Driver

Independent contractor, supplemental income — classified as accessory income by Oregon DWS

- Self-scheduled food delivery contractor; managed route planning, customer communication, and on-time delivery
- Maintained positive customer ratings through professional service and reliable delivery execution

Harry and David, Medford, OR

Seasonal Data Entry Associate

September 2023–December 2025

Three seasonal deployments: Sep–Dec 2023; Sep 2024–Feb 2025; Sep–Dec 2025

- Performed high-volume keyboard data entry of 20+ orders daily into order management system during peak holiday periods
- Verified order data integrity and reconciled discrepancies in time-sensitive e-commerce environment
- Maintained consistent accuracy and performance across all three seasonal deployments in fast-paced setting
- Worked independently with minimal supervision; reliable attendance throughout all seasons

Superior Service Transport, Salt Lake City, UT

Driver Check-in Clerk / Scheduling

April 2023–July 2023 (Contract)

- Verified, scanned, and documented transport orders into specialized transportation management system
- Processed truck trip manifests; verified documentation accuracy and maintained delivery records database
- Performed weekly load/route scheduling: optimized cargo space allocation across truck capacity (load planning)
- Coordinated with drivers and endpoint facilities ensuring on-time delivery execution
- Handled high-volume documentation processing in time-critical logistics environment

RidgeCrest Herbals, Salt Lake City, UT

Linux System Administrator & VoIP Administrator

May 2012–February 2014

Primary Linux infrastructure and VoIP services administrator for herbal supplement manufacturer

Linux Infrastructure Management:

- Administered heterogeneous Linux environment supporting 15-person team across Debian, Ubuntu, and Linux Mint distributions
- Managed server infrastructure: file servers, application servers, development environments, backup systems
- Implemented automated backup solutions using Bash scripting and Git-based configuration management
- Administered VirtualBox virtualization platform for development, testing, and legacy system support
- Maintained critical legacy DOS database via VirtualBox VMs and DOSBox emulation for business continuity
- Reduced system downtime 40% through proactive monitoring scripts and automated maintenance procedures
- Maintained Windows XP/7 client systems alongside Linux infrastructure; SSH-based remote administration
- Maintained 99%+ uptime for critical business systems throughout tenure

VoIP Infrastructure Migration & Automation:

- Migrated company telephony from legacy Asterisk PBX to FreeSWITCH; engineered complete FreeSWITCH PBX from ground up
- Created automated SIP phone provisioning templates deployable via PXE/TFTP boot environment
- Deployed 15 SIP phones plus voicemail, fax integration, printer, and 6 support lines with hunt group configuration
- Designed system scalable to 40+ endpoints using standardized provisioning templates
- Reduced telephony costs 60% by migrating from traditional PBX to open-source VoIP solution
- Integrated VoIP with existing network infrastructure maintaining QoS and call quality standards
- Established standardized Linux workstation deployment reducing setup time from 4 hours to 30 minutes
- Documented all systems and procedures for knowledge transfer and disaster recovery

ITT Systems (DoD Contractor), Afghanistan

Network Administrator

September 2009–May 2010

Security-cleared network administrator for Department of Defense communications infrastructure in combat zone

- Maintained dual-tier classified network infrastructure in hostile environment supporting 200+ users
- **Primary duty — Cisco infrastructure:** Administered Cisco switching and routing: VLANs, ACLs, routing protocols for secure network segmentation
- **Workstation provisioning:** Imaged and configured Windows workstations with standard OS, Microsoft Office, DoD-mandated security settings
- **Active Directory administration:** Added computer accounts to domain; managed user accounts (onboarding/offboarding, password resets, account management)
- Implemented critical encryption protocol updates and performed SATCOM/crypto maintenance maintaining DoD security compliance
- Provided Tier 2/3 escalation support for SATCOM administrators; coordinated on complex AD, Windows client/server, and network issues
- Executed emergency network maintenance during critical operational periods
- Maintained operational security (OpSec) protocols for classified communications infrastructure
- Earned CompTIA Security+ certification during deployment (required for position)

Teleperformance USA, Salt Lake City, UT

Total Tenure: May 2005–October 2008 (3+ years across three client contracts)

Hardware Support Technician — Dell Tier 2 Contract

July 2007–October 2008

Advanced technical support specialist for Dell enterprise and consumer hardware platforms

- Achieved Dell Tier 2 Certification for advanced hardware diagnostics and complex troubleshooting
- Resolved 40+ technical issues daily via phone and internet chat with 85%+ customer satisfaction rating
- Provided remote desktop support using TeamViewer (web-based remote session: user navigated to site and entered associate-provided one-time session code)
- Served as Resolution Specialist: mentored junior agents on complex troubleshooting and escalation procedures
- Dispatched field technicians and coordinated parts replacement for critical hardware failures
- Diagnosed hardware failures across Dell product lines: servers, workstations, laptops, peripherals

- Contributed to successful launch of Core Business Group Internet Chat support channel as first-wave team member
- Supported Windows XP and Windows Vista environments for consumer and business clients

Internet Support Specialist — Clearwire Contract

April 2006–July 2007

- Provided Tier 2 technical support for wireless broadband services and emerging VoIP technologies
- Certified as VoIP Subject Matter Expert (SME); provisioned customers for VoIP services, troubleshoot SIP connectivity
- Earned Clearwire Email Specialist certification for advanced email system troubleshooting
- Assisted fellow agents as Tier 2 resource for complex technical escalations
- Troubleshoot wireless modem connectivity, email configuration, and web hosting issues

Cable TV Support Technician — Cox Contract

May 2005–March 2006

- Provided technical and billing support for cable television services via phone
- Processed customer requests and scheduled on-site technician appointments
- Utilized AS/400 database system for customer account access when primary Java application was unavailable
- Maintained above 80% quality assurance score throughout tenure

United States Postal Service, Salt Lake City, UT

Data Conversion Operator

December 2001–January 2004

High-volume mail piece address image coding operator

- Coded letter and flat mail images into sort computer using high-speed numeric address coding: building/house numbers, 3-digit street codes, city/state codes
- Maintained under 4% error rate while processing thousands of mail pieces daily in fast-paced production environment
- Demonstrated consistent accuracy and speed across sustained high-volume coding sessions
- Met strict daily production quotas in team environment

Convergys, Murray, UT

Total Tenure: April 2000–November 2001 (1.5 years across two client contracts)

Provisional Technical Engineer — AT&T Managed Internet Services

August 2000–November 2001

Technical project manager for T1/Frame Relay business internet circuit installations

- Managed end-to-end installation projects for T1/FT1 business internet circuits: planning through activation
- Configured customer premises equipment: Cisco and Paradyne routers, CSU/DSUs for circuit termination
- Coordinated with multiple AT&T vendors and third-party circuit providers for complex installations
- Managed IP address allocation, subnet design, and routing configuration for customer networks
- Troubleshoot layer 1–3 connectivity issues during circuit installation and activation phases
- Maintained project documentation and customer communication throughout installation lifecycle
- Certified as AT&T Provisional Technical Engineer

@Home Internet Support Technician — AT&T Contract

April 2000–August 2000

- Provided technical support for cable modem internet services: connectivity, email, and browsing issues
- Utilized AS/400 database system for customer account access when primary application was unavailable
- Coordinated with network operations center for outage information and escalations
- Maintained high customer satisfaction scores in fast-paced support environment

Estrella Mountain Community College, Avondale, AZ

Computer Lab Technician

September 1997–December 1999

Student worker — campus computer lab support

- Assisted students with computer hardware, software applications, and general computing questions
- Maintained computer lab equipment, documentation, and supplies
- Assisted in setting up a LAN at a local high school as part of a class project

Del Webb Corporation, Sun City West, AZ

Accounting Assistant (Internship)

October 1996–April 1997

High school internship — accounting department

- Created, printed, and filed accounting reports for the department
- Maintained organized paper-based records management and filing systems
- Performed data entry using AS/400 system for accounting and records
- Supported department operations with administrative and clerical tasks

EDUCATION

Salt Lake Community College

2001–2006, 2016–2018

Associate of Science, Computer Science

Linux, Security, CS Theory & Programming — Windows and Linux lab environment:

- Certified Ethical Hacker (CSIS 2360) — 2018
- Linux System Administration II (CSIS 2132) — 2017; Linux System Administration I (CSIS 1132) — 2017
- Introduction to Linux (CSIS 1032) — 2016
- Software Engineering (CS 2750) — programming design, project structure, development lifecycle
- Data Structures & Algorithms — bags, trees, queues, stacks; time complexity and memory/space optimization
- Database Management (CIS 2600), Data Communications/Networking (CS 2400), Computer Architecture (CS 2620), Discrete Structures (CS 2310)

Estrella Mountain Community College

1997–1999

Computer Science Coursework

Cisco Networking & Programming Specialization — macOS 6–9 and Windows lab environment:

- Cisco Advanced Routing & Switching (CNT 160), Project Based Learning (CNT 170)
- Cisco Networking Fundamentals (CNT 140), Router Technology (CNT 150)
- C Programming I (CIS 162) — C/C++ coursework; Computer Maintenance I: A+ Preparation (BPC 170)

Boot.dev

In Progress

Full-Stack Backend Development Program

Python and Go backend development, DevOps automation, infrastructure-as-code

- Learn to Code in Python — Completed April 24, 2026
- Learn Linux — Completed April 25, 2026
- Build a Bookbot (guided Python project) — Completed April 25, 2026 | github.com/PhoenixCullen/bookbot
- Learn Git / Git Ops 1 — Completed April 25, 2026 | Webflyx project: github.com/PhoenixCullen/webflyx
- OOP, Functional Programming, Data Structures & Algorithms — In Progress
- Upcoming: Go, HTTP, Docker, SQL, Pub/Sub, AWS, CI/CD, Kubernetes

CERTIFICATIONS

Active:

- **Linux Essentials** — Linux Professional Institute (2023)
- **CompTIA Security+** (2010) — Network security, cryptography, security operations
- **CompTIA A+** (2007) — Hardware and software troubleshooting

In Progress:

- **Linux Foundation Certified System Administrator (LFCS)** — System administration fundamentals
- **Linux Foundation Certified Engineer (LFCE)** — Advanced Linux engineering (planned)

Historical:

- Cisco Certified Network Administrator (CCNA) — Routing, switching, network fundamentals
- Dell Tier 2 Hardware Certification — Advanced Dell hardware diagnostics

- AT&T Provisional Technical Engineer — T1/circuit installation and troubleshooting
- Clearwire VoIP Subject Matter Expert (SME); Clearwire Email Specialist
- CIW Web Foundations Associate — Web technologies and standards

PROFESSIONAL PROFILE

Career Context: Extensive technical background with deep expertise in Linux administration, network infrastructure, IT support, and data operations. Career timeline reflects periods of family caregiving responsibilities (2014–2023) during which technical skills were maintained through personal infrastructure projects and self-directed study. Recent Linux Essentials certification, Boot.dev completions, and pursuit of Linux Foundation certifications demonstrate active commitment to formalizing hands-on experience with industry credentials.

Current Technical Focus:

- Expanding DevOps skillset: containerization, infrastructure-as-code, CI/CD pipelines
- Security specialization: secure architecture, encryption, VM-based isolation (active Qubes OS research)
- Backend development: Python and Go for automation and infrastructure tooling
- Software Defined Networking: modern network virtualization and programmability

Work Preferences: Strong preference for remote work. Proven ability to work independently, self-manage complex projects, and maintain productivity without supervision. Comfortable with distributed team collaboration tools and asynchronous communication.

Physical Note (temporary): Recovering from surgery (May 2026); no lifting over 10 lbs until approximately late June 2026. Available for desk and remote work immediately — no restrictions apply to desk-based roles.

References available upon request | Open to remote work opportunities nationwide | Salary requirement: \$46,500+ annually (\$22.36/hr minimum)
| Available for temp, contract, or permanent positions
