Oregon Department of Transportation Delivery & Operations Division – Region 3 Dispatch Unit
Central Point, OR

Dear Sergio,

I am writing to apply for the Dispatch Coordinator position (REQ-201132) at ODOT's Central Point Dispatch Center. I was encouraged to apply by Rich Gonsalves, who is familiar with both my background and the operational needs of your team. I am a Medford resident, available immediately, and genuinely interested in contributing to public safety operations in the region I live in.

My background in transportation logistics coordination, high-volume public contact, and multi-system technical operations aligns directly with the demands of this role. At Superior Service Transport, I served as Driver Check-in Clerk and Scheduling Coordinator, managing real-time communication between drivers, dispatch, and endpoint facilities. I verified transport documentation, processed manifests, and performed weekly load and route scheduling — coordinating cargo allocation across available truck capacity under time-critical conditions. That role required sustained attention, rapid decision-making, and accurate record-keeping while managing multiple moving parts simultaneously: the same discipline a dispatch center requires.

My three years at Teleperformance USA across multiple client contracts gave me substantial public contact experience in high-volume, high-pressure environments. I coordinated between customers, field technicians, and internal teams — gathering information quickly, relaying it accurately, evaluating situations, and determining the appropriate course of action. I resolved 40+ cases daily with documented accuracy and QA metrics.

In addition, my time as a Network Administrator for ITT Systems in Afghanistan required operating and maintaining critical communications infrastructure in an active DoD environment, coordinating with multiple agencies under emergency conditions using radio and telecommunications systems. That experience gave me a working understanding of what it means to keep communications operational when the stakes are high and time is short.

I am also technically comfortable with multi-system environments. My IT and network operations background means I adapt quickly to new software platforms, monitoring tools, and communications equipment — including the kind of CAD systems, CCTV, radio, and variable message sign infrastructure this position operates.

I hold a valid Oregon driver's license, am willing and able to work flexible schedules including evenings, weekends, and rotating shifts, and am prepared to pursue LEDS certification within 90 days of hire as required.

Thank you for considering my application. I would welcome the opportunity to speak with your team about how my experience can contribute to ODOT Region 3 dispatch operations.

Sincerely,

Allen Schultz 801-550-0865 allen.schultz@gmail.com
